

SignPro Word

HANDWRITTEN SIGNATURES IN WORD DOCUMENTS

Eliminating the need to print and sign documents, *SignPro Word* allows documents to remain in the electronic domain and be signed and protected using a legally binding handwritten signature.

FEATURES

- ◆ Installs as an object from the Word main menu.
- ◆ Signatures are collected on a signature pad.
- ◆ Signatures are logically bound to the Word document being signed with contextual information about the signing event.
- ◆ Signatures can be printed to hard copy with document.
- ◆ Any number of signature areas can be added to the document.
- ◆ Signature interrogation (*who signed?, why did they sign? When did they sign?, has the document changed since it was signed?*).
- ◆ Signature crossed out if an interrogated signature shows that the document has changed since it was signed.
- ◆ Signatures can be enrolled to form a signature template which can later be used for signature verification.

BENEFITS

- ◆ No need to print documents to sign them.
- ◆ e-mail Word documents for signature rather than print them.
- ◆ Secure signatures with high evidential value for audit trails or user authentication.
- ◆ Sign important documents anytime, anywhere.

APPLICATIONS

Financial, Insurance, Legal.... anywhere signatures are required!

Diagram 1 shows a signed Word document. The signatures are shown along with the date and time of signing. If required, the reason for signing can also be shown in this box.

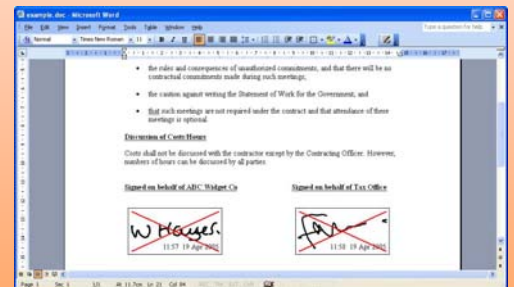

Diagram 2 shows that the final paragraph has been altered and the signatures are now invalid. The signatures will become valid again if the text is changed back to its original form.

SignPro Word

Hardware and Software Requirements

SignPro Word can be installed on a computer running Microsoft Windows 2000 or XP with Microsoft Word 2000 (version 9.x) or later.

Digitizer Tablet

A suitable digitizer tablet must be installed to provide the mechanism for signing. Any Wintab compliant digitizer may be used, examples include:

- Wacom PenPartner
- Interlink ePad-ink LCD Signature Pad
- MotionTouch LegaPad LCD Signature Pad

Florentis can supply the digitiser tablet as part of a bundle, please send an email for pricing information.

SignPro Signature Control

The *SignPro Signature Control* is installed using a setup program. It provides the signature capture software and communicates with the digitizer tablet.

SignPro Word

The setup program extends the Word menus and provides the software to allow signatures to be added to a document.
